

## Lab 2 Report Guide – ENG3014

Please complete a short report for this lab and submit it within 1 week of your scheduled lab session. This report should be no more than 3 pages. This limit includes all figures and diagrams. The document should be written in prose and in a concise manner that can be understood by someone that has not completed the lab themselves.

### **1. Introduction:**

*Outline the key aims of this lab*

### **2. Overview of equipment used and methodology**

*Outline the experiments activities completed and the equipment used.*

### **3. Results and discussion**

*Explain how the experiments conducted relates to the transfer of information in wireless communication systems. Use appropriate data collected from the lab to back up your explanation and draw connection to course content.*

### **4. Conclusion**

*Overview of the key results and reflect on what you have learned about wireless communication systems during this lab.*
